CSM_E2S_DS_E_9_5

CE

Advanced Performance and Wide Range of Selections in a Supercompact Size

- Only 5.5×5.5 mm with a built-in Amplifier.
- Maximum sensing distance: 2.5 mm. Stable detection even with workpiece fluctuations.
- Response frequency: 1 kHz.
- Low current consumption.

DC 3-Wire Models

Safety Precautions

Be sure to read the precautions for all models in the website at: http://www.ia.omron.com/.

Warning Indications

⚠WARNING	Warning level Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious in- jury or death. Additionally there may be sig- nificant property damage.	
Precautions for Safe Use	Supplementary comments on what to do or avoid doing, to use the product safely.	
Precautions for Correct Use	Supplementary comments on what to do or avoid doing, to prevent failure to operate, malfunction or undesirable effect on product performance.	

Meaning of Product Safety Symbols

General prohibition Indicates the instructions of unspecified prohibited action.
Caution, explosion Indicates the possibility of explosion under specific conditions.

∴ WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Otherwise, explosion may result. Never use the product with an AC power supply.

Precautions for Safe Use

The following precautions must be observed to ensure safe operation.

- 1. Do not use the product in an environment where flammable or explosive gas is present.
- 2. Do not attempt to disassemble, repair, or modify the product.
- Do not use a voltage that exceeds the rated operating voltage range. Applying a voltage that is higher than the operating voltage range may result in damage or burnout.
- Be sure that the power supply polarity and other wiring is correct. Incorrect wiring may cause explosion or burnout.
- 5. If the power supply is connected directly without a load, the internal elements may explode or burn. Be sure to insert a load when connecting the power supply.

Dispose of the product according to applicable regulations (laws).

Precautions for Correct Use

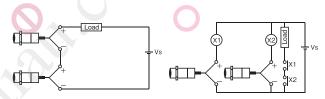

Do not use this product under ambient conditions that exceed the ratings.

Operating Environment

- Do not install the product in the following locations.
 Doing so may result in product failure or malfunction.
 - Outdoor locations directly subject to sunlight, rain, snow, water droplets, or oil.
 - (2) Locations subject to atmospheres with chemical vapors, in particular solvents and acids.
 - (3) Locations subject to corrosive gases.
- 2. The Sensor may malfunction if used near ultrasonic cleaning equipment, high-frequency equipment, transceivers, cellular phones, inverters, or other devices that generate a high-frequency electric field. Please refer to the Precautions for Correct Use on the OMRON website (www.ia.omron.com) for typical measures.
- 3. Laying the Proximity Sensor wiring in the same conduit or duct as high-voltage wires or power lines may result in incorrect operation and damage due to induction. Wire the Sensor using a separate conduit or independent conduit.
- Never use thinner or other solvents. Otherwise, the Sensor surface may be dissolved.

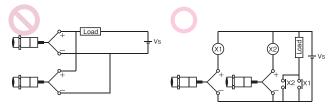

AND Connection of Proximity Sensors (DC 2-Wire)

Two or more sensors cannot be connected in series on the AND circuit. Use them via a relay as shown on the figure.

OR Wiring of Proximity Sensors (DC 2-Wire)

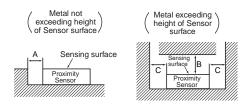

As a general principle, two or more sensors cannot be used in parallel on the OR circuit. It is possible only when sensors do not operate simultaneously and loads do not need to be maintained. When loads need to be maintained, use the sensors via a relay as shown on the figure.

Design

Influence of Surrounding Metal

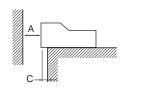

- When mounting the Sensor within a metal panel, ensure that the clearances given in the following table are maintained. Failure to maintain these distances may cause deterioration in the performance of the Sensor.
- Models with Top Sensing Surface

(Unit: mm)

Model Distance	Α	В	С
E2S-W1□	0	8	2
E2S-W2□] "	15	10

• Models with Front Sensing Surface

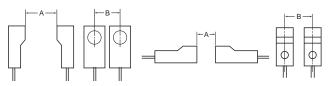

(Unit: mm)

Model Distance	Α	В	С
E2S-Q1□	8	3	2
E2S-Q2□	15	10	3

Mutual Interference

When installing Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

 Models with Top Sensing Surface Models with Front Sensing Surface

(Unit: mm)

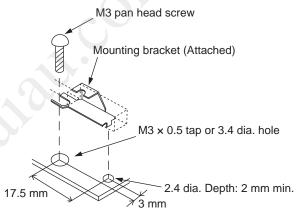

Model Distance	Α	В	
E2S-W(Q)1□	50 (40) *1	20 (5.5) *1, *2	
E2S-W(Q)2□	75 (50) * 1	25 (8) *1, *2	

*1. Values in parentheses apply to Sensors operating at different frequencies.

Mounting

E2S-W1/Q1

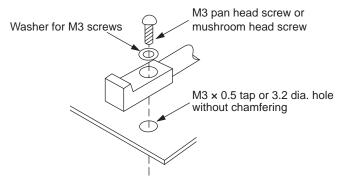

Please use the set distance within 1.2 mm.

E2S-W2/Q2

When mounting with screw, use washers and use a tightening torque of 0.7 N·m or less.

Please use the set distance within 1.9 mm.

Applicable e-CON Connector Models and Manufacturers

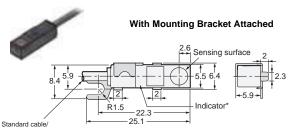

The companies and model number of e-CON connections that can be used with Sensor cables are listed in the following table. Confirm applicability when purchasing e-CON connectors for connection to Pre-wired Sensors.

Model	Applicable e-CON Connector	Manufacturer
E2S-W□3/4	XN2A-1470 Cable Plug Connector	OMRON
E2S-Q□3/4		

^{*2.} Mutual interference will not occur for close-proximity mounting if models with different frequencies are used together.
